1. BENEFITS OF SHUTTERS

The name S:CRAFT has become synonymous with the finest quality made-to-measure Plantation Shutters and Blinds and the widest choice of shutter materials, styles, options and colours available in the UK.

Designed to your exacting requirements, S:CRAFT interior shutters will accentuate your windows and doors perfectly, offer a superior window covering and provide an outstanding array of unique benefits.

Ultimate light control
Each panel can be independently adjusted to temper the light and provide outstanding light control.

Supreme privacy
Shutter panels can be divided into independently controlled sections allowing natural light in but keeping unwelcome attention out.

Insulating and economical
S:CRAFT shutters not only keep you cool during the summer, but help retain heat during the winter.

Sound insulation
Adding an additional layer to your glazing, shutters not only block out light but help reduce noise levels too, making them ideal for homes near busy roads.

Awkward shapes
Shutters are possibly the only window furnishing that can be manufactured to suit all window shapes, no matter how curved or angled, small or large.

Low maintenence
S:CRAFT shutters are quick and easy to clean and offer a virtually maintenance-free existence - excellent for dust allergy sufferers.

WHAT SETS SHUTTERS APART

As demonstrated here, S:CRAFT shutters are more than just a window covering. They are a lifestyle feature, designed to function around your needs. This bi-fold track system provides complete privacy when shut, split privacy to let the light in or can be opened completely.

6. THE S:CRAFT MARK OF QUALITY

BUILT TO PERFECTION GUARANTEED TO LAST

Using unique production methods, such as transverse multi-ply stiles, we can ensure that S:CRAFT shutter panels are unlikely to bow or warp. And for added strength we use only mortise and tenon joints. This also helps to minimise any panel movement which may cause hairline cracking of paint finishes at the joint.

For further protection, we also engineer the shutter panels with a grooved overlap to mask and absorb any joint expansions.
